## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTION

By Mrs. FEINSTEIN (for herself and Mrs. CAPITO):

S. 273. A bill to improve the management of driftnet fishing; to the Committee on Commerce, Science, and Transportation.

Mrs. FEINSTEIN. Mr. President, I am pleased to introduce the "Driftnet Modernization and Bycatch Reduction Act." I thank Senator CAPITO for her cosponsorship as well as continued partnership on this important legislation.

This bipartisan bill passed the Senate last Congress by unanimous consent and then passed the House of Representatives in December 2020. Unfortunately, then President Trump chose to veto the bill based on misguided policy and inaccurate data.

I urge my colleagues to once again support this bill, which solely affects California fishery management, but has far-reaching beneficial impacts for a wide range of marine animals, including endangered species. This legislation modernizes a commercial fishery to promote sustainable fishery management and creates a win-win for conservation goals and commercial fishing profitability.

### THE ISSUE

Large mesh drift gillnets, as defined in this legislation, have a mesh hole size of 14 inches or greater and are used to target swordfish and thresher shark off the California coast. However, alarmingly, these nets utilized by this one fishery in Federal waters, according to NOAA, are responsible for 90% of porpoise and dolphin deaths in all west coast fisheries combined.

These substantially sized nets are between 1 and 1.5 miles long and extend more than 100 feet below the ocean's surface. This creates a "net wall" that ensnares approximately 60 non-target species, known as bycatch, leading to severe harm or drowning of endangered marine turtles, whales, dolphin, and numerous fish species.

In addition to being banned everywhere else in the United States and in
